

# Project Design Phase

## Solution Architecture

Date	4 Nov 2025
Team ID	NM2025TMID02156
Project Name	To supply leftover food to poor
Marks	4Marks

### Solution Architecture (High-Level Design)

#### Layers of the Architecture

##### 1. User Layer (Front-End / Interfaces)

###### Users:

- **Food Donors** (restaurants, marriage halls, caterers, households)
- **Volunteers / Delivery partners**
- **NGOs / Shelters / Receiving points**
- **Admin (Management Backend)**

###### Interfaces:

- Mobile App (Android / iOS)
- Web Portal

- WhatsApp / Call-based request support (for non-technical donors)

## 2. Application Layer (Core Logic / Services)

Service	Function
<b>Request Management Service</b>	Captures donor request (food type, quantity, pickup time, location).
<b>Volunteer Assignment Service</b>	Assigns nearest volunteer using GPS and availability.
<b>Food Safety Validation Module</b>	Image proof + timestamp + checklist.
<b>Tracking &amp; Routing Service</b>	Live tracking of pickup and drop route.
<b>Notification Service</b>	Push notifications, SMS, or WhatsApp alerts.
<b>Reporting &amp; CSR Module</b>	Generates impact reports for donors and NGOs.

## 3. Data Layer (Database + Storage)

Database / Storage	Data Stored
<b>User Database</b>	Donor, NGO, volunteer details.
<b>Request Database</b>	Food donation requests, timestamps, status.
<b>Geo-Location Data</b>	Coordinates of pickup and drop points.
<b>Media Storage</b>	Photos of food quality, delivery proof.

## 4. Integration Layer (APIs & External Services)

Integration	Purpose
<b>Google Maps API / OpenStreetMap</b>	Location tracking, route optimization.
<b>SMS/WhatsApp API</b> (Twilio etc.)	Notifications.
<b>CSR/Documentation API</b> (optional)	Certificate / reporting automation.

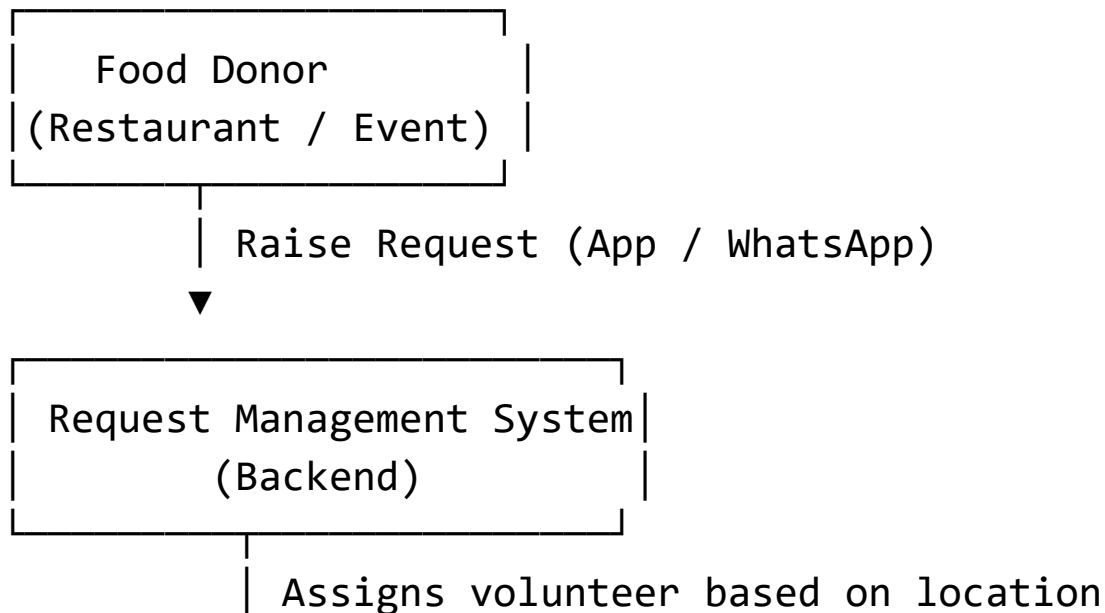

## 5. Security & Compliance Layer

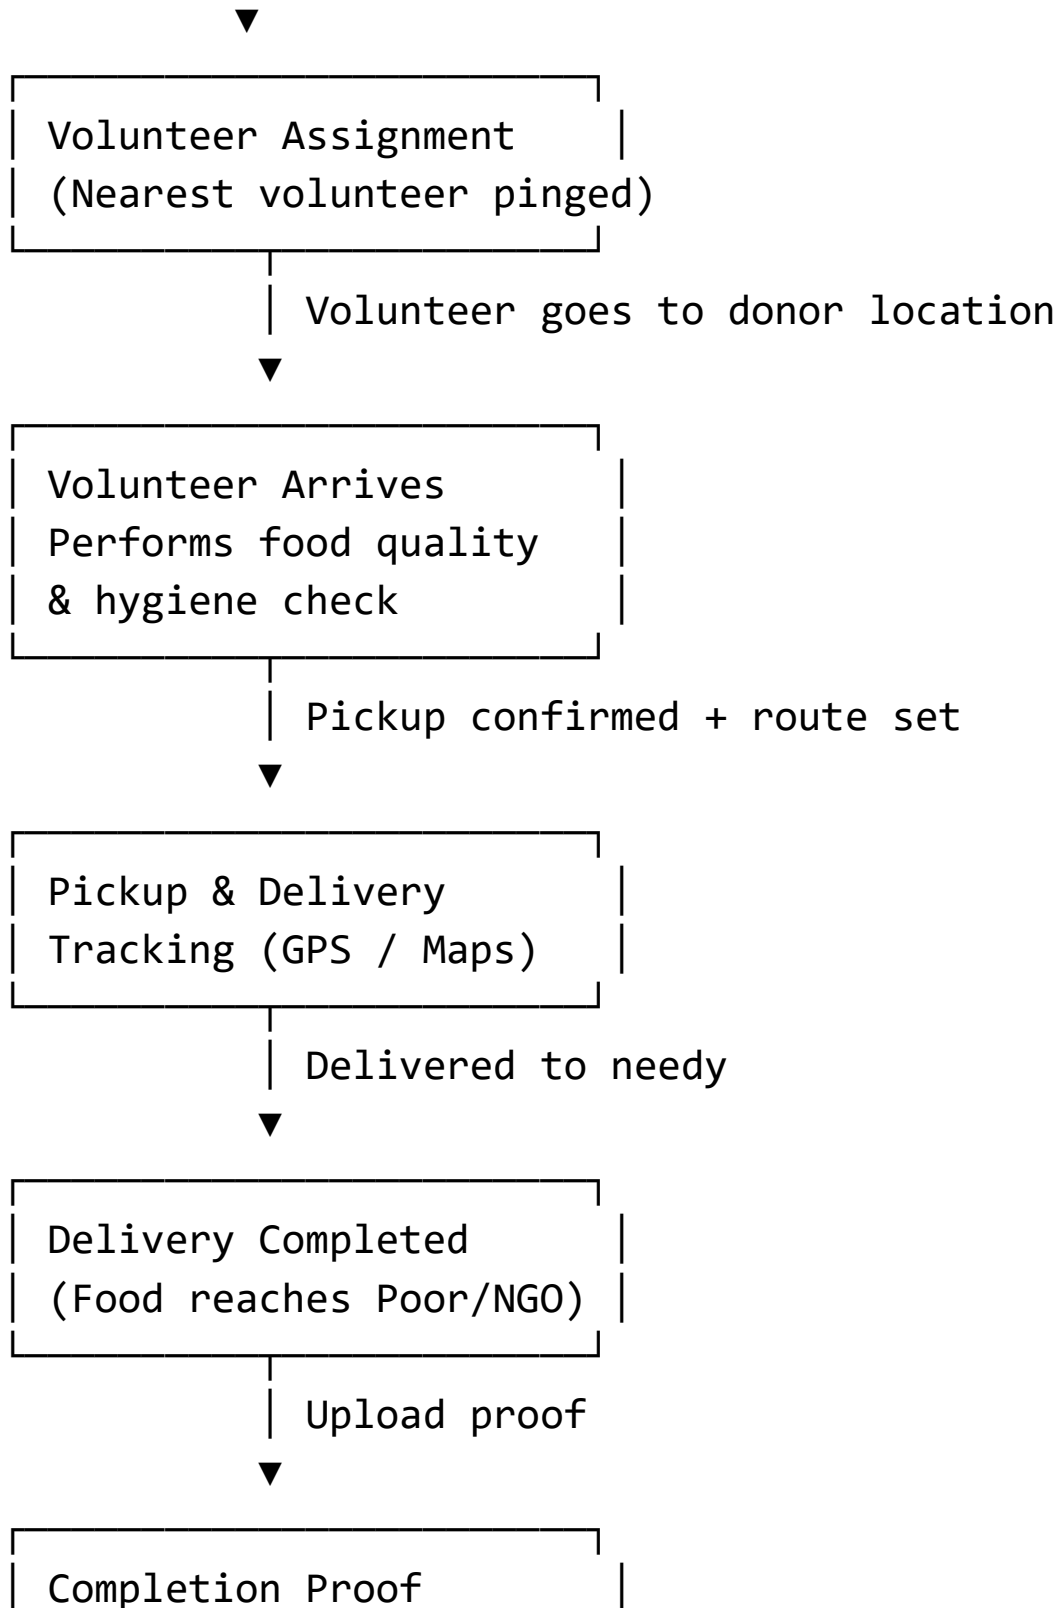

- Authentication (Signup/Login)
- Role-based Access Control (Donor/Volunteer/NGO/Admin)
- Data Privacy (No personal data misuse)
- Food safety compliance checklist

## 6. Deployment / Infrastructure Layer

- **Cloud Hosting (AWS / Azure / GCP)**
  - App deployment (web + backend services)
  - Database hosting
  - Storage buckets for photos and media

### ✓ Food Donation Flow (Process Flow Diagram – Text)
